Envirostream Australia COVID update

HIGHLIGHTS

- **Envirostream Australia continues to operate during Melbourne lockdown.**
- **Battery recycling considered an important infrastructure service.**

Melbourne lockdown

Envirostream Australia Pty Ltd ('Envirostream') confirms that its Melbourne battery recycling facility will continue to operate under the guidelines recently released by the Victorian government during its stage-4 lockdown. Envirostream has been included in the list of 'Electricity, gas, water and waste services' considered important infrastructure and is also classified as an essential service.

Envirostream previously put in place strict COVID-19 protections for the benefit of its employees and the general community, and continues to play a vital role in preventing toxic battery waste from entering both landfill and ground-water systems.

Authorised for release by the Board.

About Lithium Australia NL

Lithium Australia aims to ensure an ethical and sustainable supply of energy metals to the battery industry (enhancing energy security in the process) by creating a circular battery economy. The recycling of old lithium-ion batteries to new is intrinsic to this plan. While rationalising its portfolio of lithium projects/alliances, the Company continues with R&D on its proprietary extraction processes for the conversion of *all* lithium silicates (including mine waste), and of unused fines from spodumene processing, to lithium chemicals. From those chemicals, Lithium Australia plans to produce advanced components for the battery industry globally, and for stationary energy storage systems within Australia. By uniting resources and innovation, the Company seeks to vertically integrate lithium extraction, processing and recycling.
