Lithium Australia Managing Director, Mr Adrian Griffin, said today:

"Lithium Australia has maintained a policy of creating real value for shareholders: take a look at MetalsTech Ltd (ASX: MTC) which showed a 30% gain on IPO in February 2017 and is currently trading at a premium to its IPO price of \$0.20. The BEM Priority Offer gives LIT shareholders a priority entitlement to gain exposure to energy metals on the anode side of the battery: graphite is an important mineral for the continuing battery revolution.

LIT will be a substantial shareholder in BEM, further strengthening the LIT balance sheet."
