(Managing Director)  
**Bryan Dixon**  
(Non-Executive Director)

## **Lithium pegmatites identified at Lake Seabrook (ASX: CXB)**

Cobre Montana NL (ASX:CXB) has identified lithium pegmatites on the shores of Lake Seabrook, approximately 60km north of Southern Cross, Western Australia. The pegmatites contain lithium mica, beryl and tourmaline. Cobre has applied for an exploration licence (see attached plan) covering most of the known pegmatite swarm.

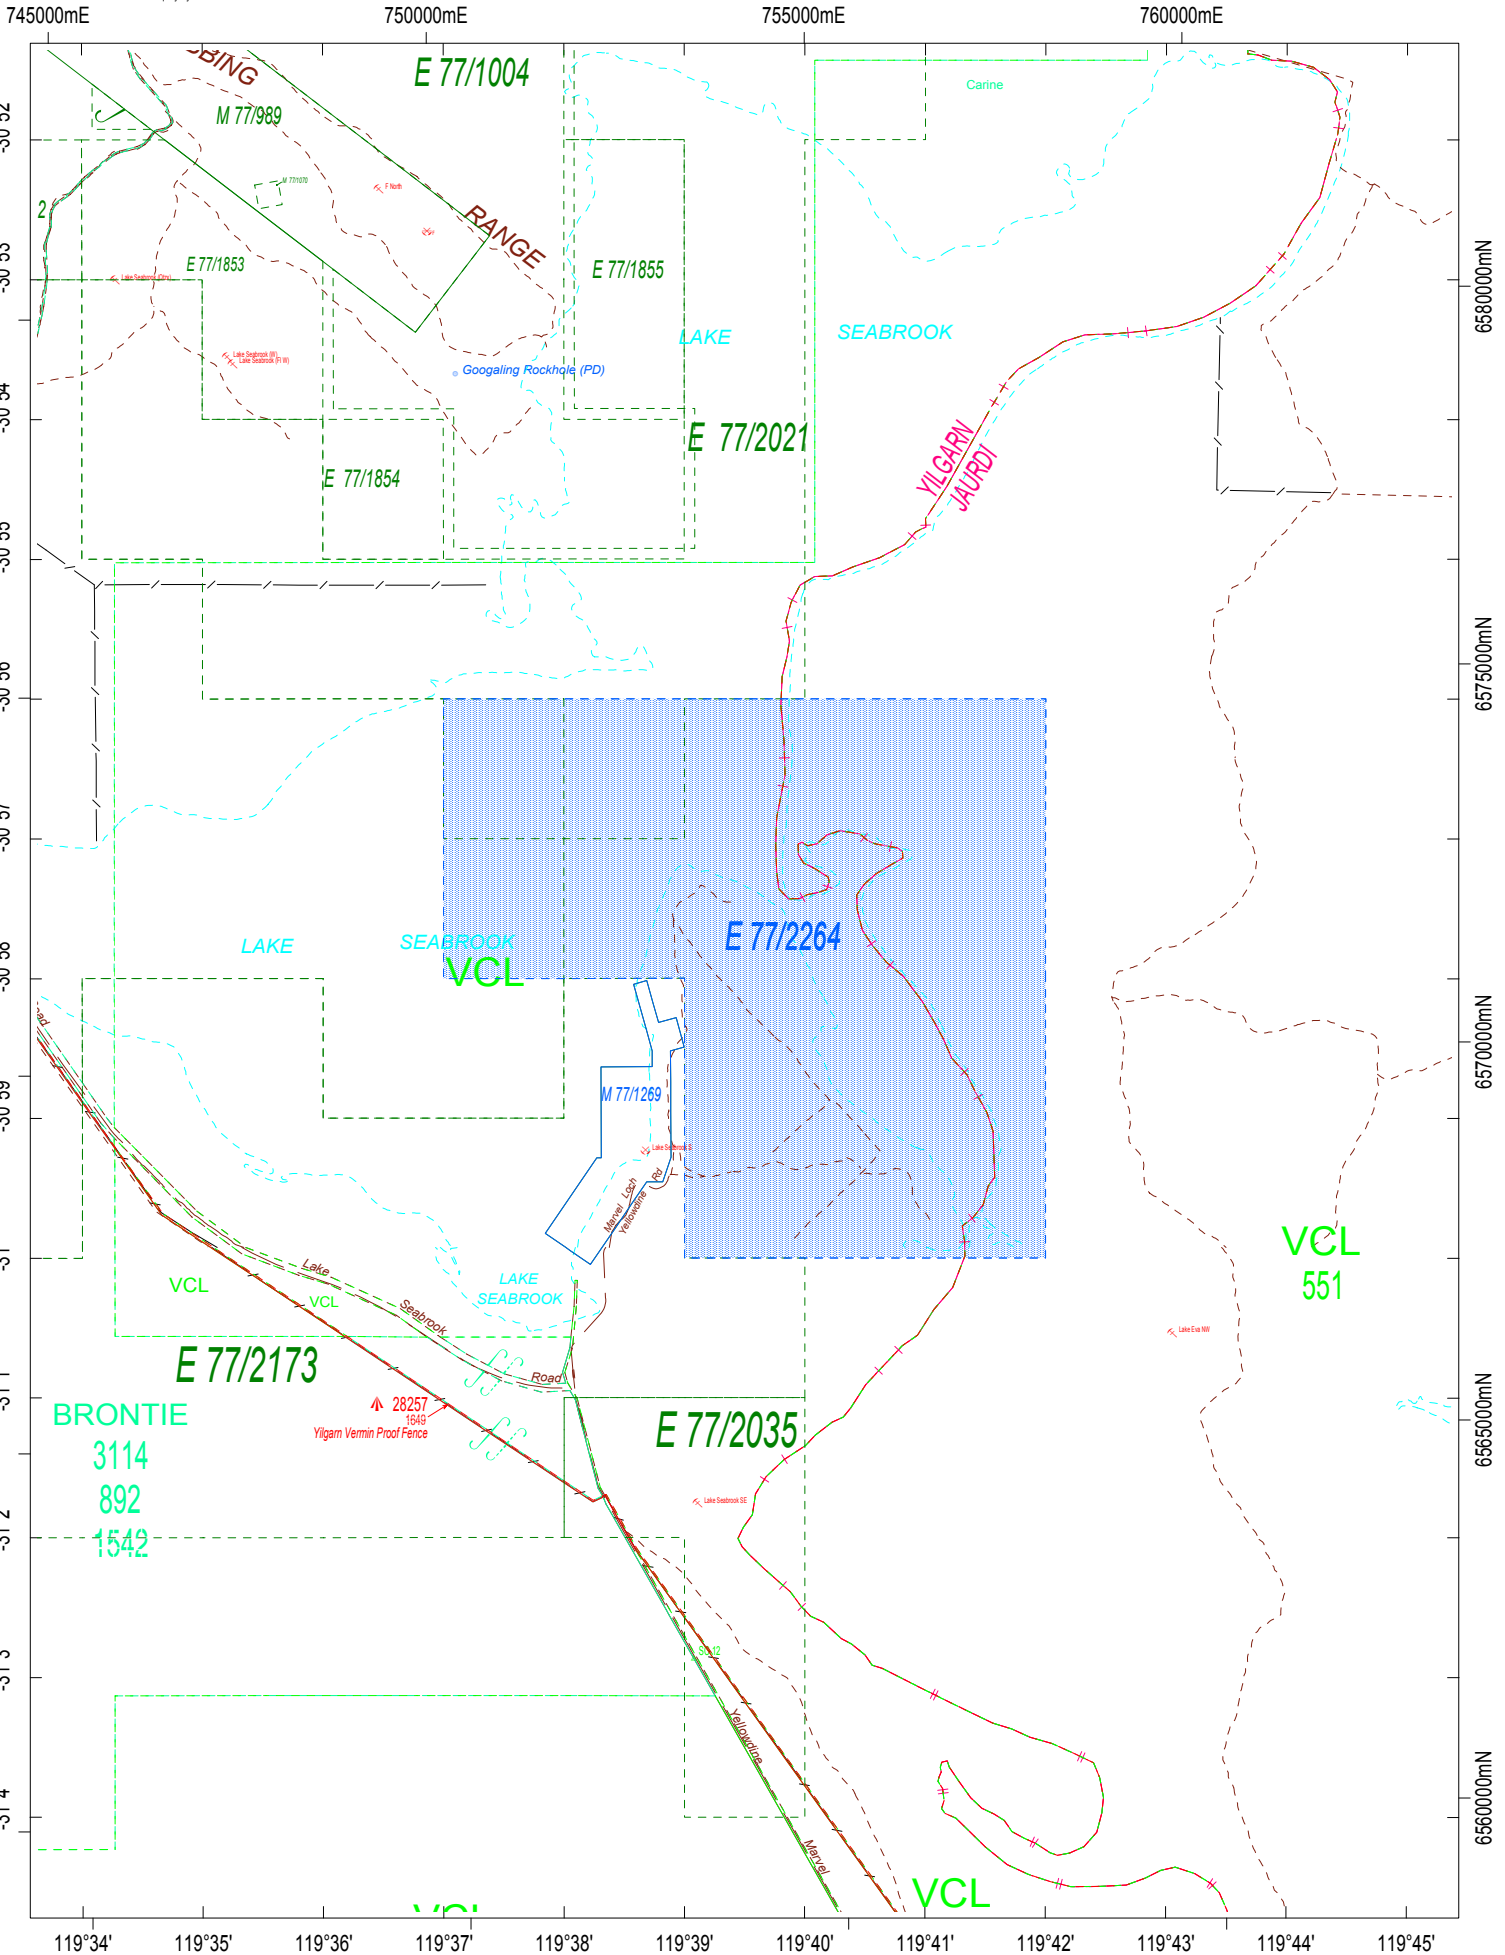

The Lake Sebrooke licence application adds to the lithium and rare metal potential accumulated in Cobre's strategic metal portfolio, which includes Ravensthorpe and the Coolgardie Rare Metals Venture (an initiative of Cobre and ASX listed Focus Minerals Limited). Both projects are located within Western Australia and close to well-developed infrastructure.

### **ABOUT COBRE MONTANA**

Cobre Montana NL (ASX:CXB) has a strategic alliances with Focus Metals Limited to investigate lithium and rare metals in the Coolgardie region of Western Australia. Cobre also has lithium exploration assets near Ravensthorpe, Western Australia, and a technical alliance with Strategic Metallurgy P/L to optimize lithium extraction technology on the type of mineralization under investigation. Cobre also holds a 55% interest in the Piedrecillas copper/silver project 180km SW of Santiago, Chile.

This plan has been compiled from various data sources received from a number of agencies and with information supplied by applicants for mining tenements. No responsibility is accepted for any error or omission. The Commonwealth of Australia (c) 2002, through Geoscience Australia and the Department of Defence, maintains copyright over those parts of the topographic data it has provided for display in TENGRAPH. Users wishing to use the data in its unaltered form should contact Geoscience Australia at [www.ga.gov.au](http://www.ga.gov.au). Confirmation of the extent and composition of any Native Title Claims should be sought from the Native Title Spatial Services Landgate. Tenograph does not identify any land that has been alienated from the Crown before 1 January 1989 and a search of title records should be carried out through Landgate to identify the category of land. Land alienated from the Crown prior to 1 January 1989 may be open for mining only in respect to gold, silver and precious metals.
